1. The finality of office action mailed 3/13/2002 is hereby withdrawn.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Long in view of background invention of Chow or Chow(newly cited 5,644,629).

Long discloses a telephone circuit to control off-hook status during receipt of called ID signal comprising:

preprogramming method device with access parameters;

detecting a phone call;

receiving caller identification information without answering the phone call;

decoding caller identification information;

comparing caller identification information with access parameters to determine whether access is authorized;

if access is unauthorized using the answering machine respond in the normal fashion ; and

if access is authorized, enabling a connection to the telephone personal communications system (see details of figure 3B).

Long discloses all the subject matter of the claimed invention with the exception hanging up communication. the background invention of Chow or Chow from the same or similar fields of endeavor teaches a provision of Quick hang up (see column 2 lines 8-14 and column 8 line 54-58. Thus, it would have been obvious to the person of ordinary skill in the art at the time of the invention to use the quick hang up as taught by Chow in the communications network of Long for the purpose of terminating the unwanted list numbers.

For claims 9,11, Long and Chow disclose all the subject with the exception of authorized times of day and authorized day to

accept the calls in the communications network. However, programming the authorized day and times to call is well-known in the art . Thus, it would have been obvious to the person of ordinary skill in the art at the time of the invention to program the authorized days and times to calls in the communications network of Long and Chow as well-known advantages.

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

In the remarks of 8/20/2002 applicant traverses the rejection of claims 7-19. The traversal is based on the ground that the references do not teach hang up. This argument is not considered to be persuasive, applicant's attention is directed at column 2 lines 8-14 and column 8 lines 54-58 of Chow wherein it teaches hang up.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANG T TON whose telephone number is 703-305-4739. The examiner can normally be reached on MON-WED, 5:30 AM-6:00 PM and Thur 5:30-9:30 A.M.
